Subject: RE: Rolling Knolls....

Bill Lodder called me around lunchtime and made it clear that he would like this solved at the staff level. He was sending me all the info (I may have it but I am 200 emails behind) that he had previously sent you guys for me to review. I have zero available time in the next two weeks though.

Subject: Rolling Knolls....

The PRP group reached out Betsy and would like to set up a 1-hour call with one or both of you on the status of Rolling Knolls. They are particularly concerned with the state's FS comments, and I'm sure are curious about the status of our discussions with FWS/DOI.

I am not sure how much we can say at this point given all the moving parts.

What are your thoughts on setting up such a call in the next couple of weeks, or should we push it out? Let me know if we should set up an internal meeting, perhaps with ORC too.

Thanks

Stephanie Vaughn
